Data Source: Surveillance, Epidemiology, and End Results SEER Program, National Cancer Institute, Underlying mortality data provided by National Center for Health Statistics. Rates are calculated using SEER*Stat Version 7.0.5.

Cancer Deaths: Deaths with malignant cancer as the underlying cause of death.

Crude rates are deaths per 100,000 population. Age-adjusted rates are deaths per 100,000 population age-adjusted to the U.S. 2000 standard population.

95% CI: 95% confidence interval of the rate.

*Other Race includes American Indian/AK Native and Asian/Pacific Islander

NSD = Non sufficient data. Data not available due to too few cases.

NApp: Not applicableage-adjusted rates are not calculated for age-specific groups.
